REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

An optical waveguide device, comprising:

- an optical waveguide for transmitting light having a predetermined wavelength along a first direction that is perpendicular to second and third directions the second and third directions being perpendicular to each other; and
- defining surfaces defining the optical waveguide, wherein the defining surfaces include a pair facing parts that face each other along the second direction, wherein the distance between the facing parts is less than the half of the wavelength of the light transmitted through the optical waveguide, and wherein among the defining surfaces, at least the facing parts are made of plasmon activating medium.

The underline limitations is critically, since the device is improved: an optical waveguide device increases the intensity of light transmitted through an optical waveguide for a reduced cost without expanding the area of the light.

The prior art submitted by the applicant on February 16, 2005, do not discloses the optical waveguide with the underlined limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
